

The Society for Sustainability and Environmental Engineering presents

Does The Victorian Transport Plan contribute to a sustainable future?

Monday 23 February 2009
1715 pm – 1920 pm

John Connell Auditorium, Engineering House
 21 Bedford Street, North Melbourne

Imagine the future of Victoria – is it a sustainable one under this Plan?

Transport is a major emitter of carbon. Does the Plan go far enough to reduce our dependency on road transport and our impact on climate change?

How does it support the Melbourne 2030 strategy? Is it truly integrated with land use planning? Will it contribute to the health and wellbeing of all Victorians?

How can we influence change and what behavioural changes can we make to contribute to a more sustainable future?

Time	Presenter	Focus
17.15	Registration	
17.35	Sven Eriksson, SSEE	Welcome and Introduction
17.45	Malcolm Baalman, Director Stakeholder Engagement, Department of Transport	About the Victorian Transport Plan. Key initiatives and how they contribute to Victoria's sustainability.
